Sep 2019 – Jul 2022

PROJECTS

Full Stack NextJs Application | React
Dictionary | Demo(click)
March 2023 – May 2023

- Developed using Next.js and React.js, acting as an interactive dictionary for informal expressions.
- Employed SCSS for a modern UI design with a Dark Mode feature, enhancing user experience.
- Utilized Supabase for efficient backend operations including user authentication and database management.
- Enabled registered users to contribute by adding expressions and interacting via a like-dislike system.

Full Stack NextJs Application | React
To-do List | Demo(click)
July 2023 – July 2023

- Developed using Next.js and React.js, acting as a todo list for users.
- Employed SCSS for a modern UI design.
- Integrated a user-friendly 'Dark Mode' toggle for a more comfortable viewing experience.
- Utilized Supabase for efficient backend operations including user authentication and database management.
