PROJECTS

Headless WordPress Frontend | NextJs Application

Demo here
August 2023 – September 2023

- Developed using Next.js and React.js, paired with TypeScript, acting as a frontend for a wordpress blog.
- Utilized Graphql to get the data from the wordpress blog.

Dictionary | NextJs Application

Demo here
March 2023 – May 2023

- Developed using Next.js and React.js, acting as an interactive dictionary for informal expressions.
- Utilized Supabase for efficient backend operations including user authentication and database management.

To-do List | NextJs Application

Demo here
July 2023 – July 2023

- Developed using Next.js and React.js, acting as a todo list for users.
- Utilized Supabase for efficient backend operations including user authentication and database management.

You can see all my projects here.

ABOUT ME

"I'm a perfectionist who developed a passion for computers and technology from an early age. My goal is to grow and constantly learn new things, specifically to be at least 1% better each day than the day before."

HOBBIES

Tennis | Football | Camping | Reading | Gaming | History
