PROJECTS

Full Stack NextJs Application | React

Dictionary | Demo(click)
March 2023 – May 2023

- Developed using Next.js and React.js, acting as an interactive dictionary for informal expressions.
- Employed SCSS for a modern UI design with a Dark Mode feature, enhancing user experience.
- Utilized Supabase for efficient back-end operations including user authentication and database management.
- Enabled registered users to contribute by adding expressions and interacting via a like/dislike system.

NextJs Application | React

Portofolio | Demo(click)
June 2023 – June 2023

- Developed using React.js and SCSS to showcase the developer's profile and portfolio.
- Included an 'About' page with a photograph, introduction, downloadable CV, and social media links for a comprehensive professional profile.
- Integrated a user-friendly 'Dark Mode' toggle for a more comfortable viewing experience.
- Featured a 'Portfolio' page displaying an array of projects, each with its utilized technologies, description, and links to live demos and GitHub repositories.

You can see all my projects here(click).

ABOUT ME

"I'm a perfectionist who developed a passion for computers and technology from an early age. My goal is to grow and constantly learn new things, specifically to be at least 1% better each day than the day before."

HOBBIES

Tennis | Football | Camping | Reading | Gaming | History
